FINDINGS

❑ Most important factors impacting price of housing in Melbourne are ranked as follows.

1. Building Area
2. South Metro region
3. Year built
4. Distance
5. Landsize
6. Rooms
7. East Metro region
8. Bathroom
9. Car space
10. Home

FINDINGS CONT'D

- ☐ E Vic, N Vic, W Vic appear to have cheaper price, large distance, large land size, more car space constructed in 80's and 90's.
- ☐ E Metro, N Metro, S Metro appears to have higher price, short distance, less land size, slightly less car space and 50's, 60's construction
- ☐ SE Metro appears to be expensive at a distance with 2 car spaces and mid 70's construction.
- ☐ W Vic appears to be cheapest in price, 3rd largest in distance, small land size, larger building area, more rooms, car spaces and less bathrooms.
- ☐ The supervised learning model appears to have high variance and low bias
